

# LALIZAS Release Hook LAR 36, SOLAS/MED

## Automatic & manual operation in one hook for extra safety

The LALIZAS Release Hook LAR 36 is an off-load release hook, suitable for davit launched liferafts, lifeboats & rescue boats, with a davit load up to 3670 kg / 8091 lb.

The two modes of operation allow for safe evacuation regardless of the conditions:

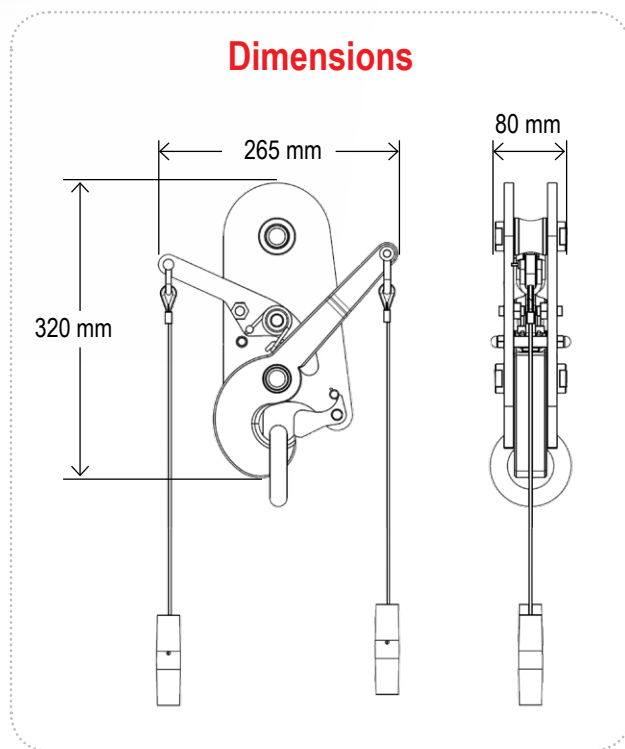

- ▶ **Automatic release mode:** by activating the automatic release mechanism prior to splashdown, the hook will open automatically when the craft becomes waterborne.
- ▶ **Manual release mode:** when the craft is waterborne, but has not been auto-released (due to added load on the hook while being towed or due to bad sea conditions), then the manual release mode must be activated by the user.

*Remember that with this release hook, the actuating lever of the automatic release must be pulled prior to splashdown, for both automatic and manual release modes.*

Code: 74387  
Made in EU

Specifications	
Material	Inox 316 for high corrosion resistance
Safe Working Load (kg / lb)	36 kN (3670 / 8091)
Weight (kg / lb)	10 / 22.5
Dimensions (mm / in)	320 x 265 x 80 / 12.5 x 10.4 x 3.1

\* LALIZAS Release Hook LAR 36, for Liferafts is covered by EU/US Mutual Agreement (MRA), Limited to use: to Davit-Launched liferaft automatic release hook (46 CFR 160.170).
